# PROJECT GROUP

- AZRA BERFİN KAYA  
2016556037
- YAREN TUNÇDEMİR  
2016556059
- BARIŞ YILDIRIM  
2016556068
- BURAK GÜL  
2016556028

## 2.PROJECT REQUIREMENTS

It is an inquiry service where students can easily access the books whose they need.

- SQL
- PSEUDOCODE
- ER DIAGRAM
- PROGRAMMING
- TEST

**“It's a query  
database system  
that allows us to  
easily manage data.  
We plan to direct  
our project by  
drawing ER  
Diagram.”**

“We used javascript, CSS, C# and HTML software language by using visual studio platform about.

Finally, we will do the necessary tests and start presenting our project to users.”

### 3. INFORMATION ABOUT PROJECT

- Book Store Database Management System ER diagram of a book stock management system is given below.
- Books are written by authors & published by the publishers. Shopping basket contains books. User takes book from shopping basket.

### 3.INFORMATION ABOUT PROJECT

- The bookstore keeps the name, surname, address, email, id, and phone of its users. User is uniquely identified by id. A user owns several shopping basket. A shopping basket is identified by a basketID and contains several books.

### 3.INFORMATION ABOUT PROJECT

- Some shopping baskets may contain more than one copy of same book. The database records the number of copies of each book in any shopping basket.

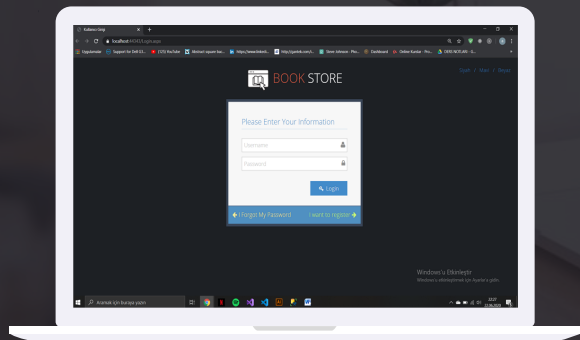

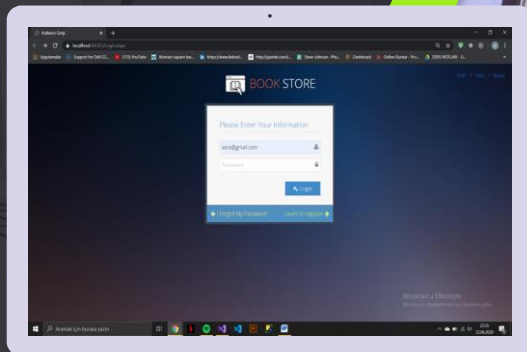

## 4.THEME OF HOMEPAGE

We have created a section on which color theme to choose when signing up to our site in the upper right corner of our local host screen. The colors of our site are black, blue and white.

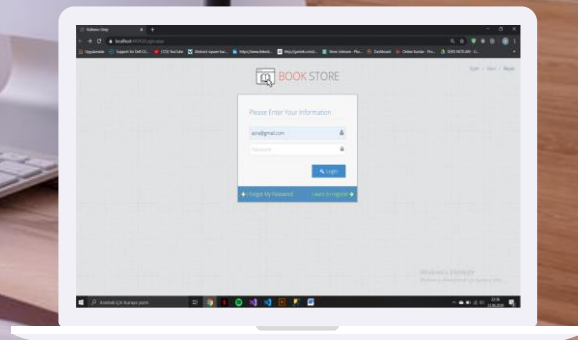

**BLACK THEME**

**BLUE THEME**

**WHITE THEME**

## PART OF CODE

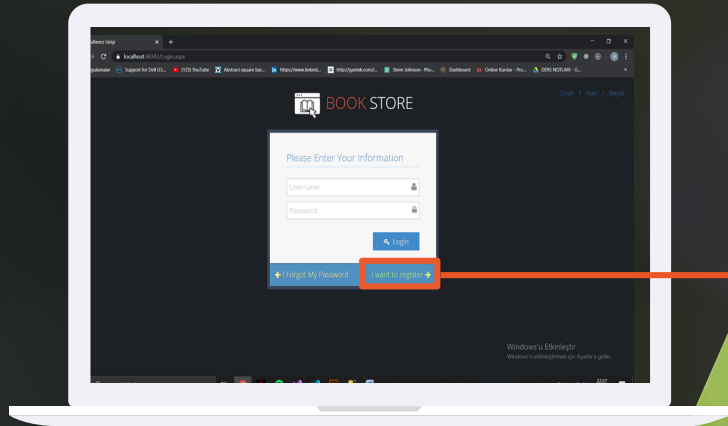

```
<div class="navbar-fixed-top align-right">  
    <br />  
    &nbsp;  
  
    <a id="btn-login-dark" href="#">Siyah</a>  
    &nbsp;  
  
    <span class="blue">/</span>  
    &nbsp;  
  
    <a id="btn-login-blur" href="#">Mavi</a>  
    &nbsp;  
  
    <span class="blue">/</span>  
    &nbsp;  
  
    <a id="btn-login-light" href="#">Beyaz</a>  
    &nbsp; &nbsp; &nbsp;  
</div>
```

## 5.LOGIN PAGE

        cmd.ExecuteNonQuery();
        cnn.Close();

    }
}
```

## 7. BOOKS PAGE

- Here we are on the book page of our bookstore site. There are books on our site on this page. How many of the books are there? If we do not have a book in our stocks, we cannot purchase that product and these features are also available.
- Finally, if our users want to buy the book that we have in stock, we direct them to the purchase page.

## PART OF CODE

```
<td>

</td>

<td>Başucumda Müzik</td>

<td>Kürşat Başar</td>

<td>

<small>

<s class="red">$19.99</s>

</small>

<b class="green">$9.99</b>

</td>

<td class="hidden-480">

</tr>
```

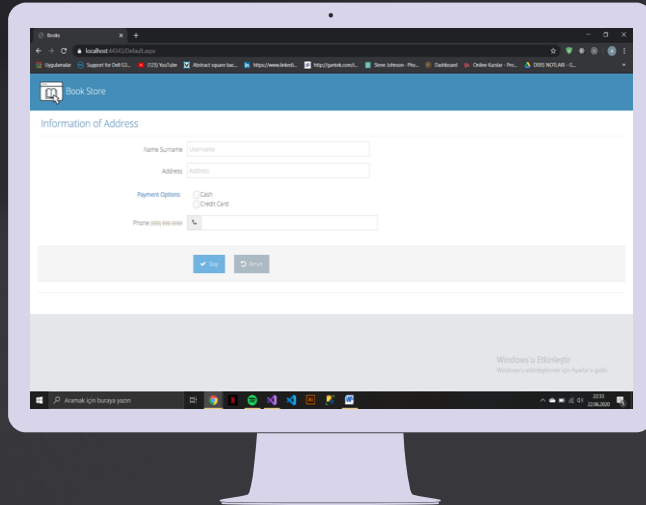

## PART OF C# CODING

```
protected void btnBuya_Click(object  
sender, EventArgs e)  
{  
  
Response.Redirect("/Default.aspx");  
}
```

## 8. INFORMATION OF ADDRESS

- We received the address information of our member who will receive books on our Information of address page and tried to make a reliable way to go to the address after purchasing the book. We designed the last part of our project in this way, and it is a project that we can develop even more in the future and be auspicious to its users.
